EXPERIENCE

Associate Software Engineer (MEVN)

AddWeb Solution

06/2022 - Present Jaipur

- Lead a team of 4 members in a front-end project, ensuring effective collaboration and achieving project goals.
- Successfully upgraded an older company project to the latest technology, enhancing its performance and compatibility.
- Managed client projects independently as a solo developer, demonstrating effective problem-solving and project delivery skills.

Frontend Developer

Twinscoder

03/2021 - 05/2022 Remote

- Implement API in front-end (Vue js) provided by the backend developer
- Create an interactive website using HTML, CSS and JAVASCRIPT
- Convert Figma design to HTML and CSS

PROJECTS

ARTE BEAT EVENT MANAGEMENT

<https://arte-beat.net/>

Summary: I have developed an interactive and user-friendly website with a user and admin dashboard. Users can purchase tickets for events using the Stripe payment gateway. The admin has the ability to approve event organizers and approve events added by the organizers..

Technologies Used: Vue js 3, Bootstrap, State Management (Pinia js), Stripe, Axios

BLASTERO ADVERTISING AGENCY

<http://blastero.com>

Summary: I have developed a full-stack web application using Nuxt.js and Node.js, which includes an admin panel. This panel enables users to purchase plans, manage their subscriptions, and cancel their subscriptions. The web application also integrates a payment gateway, specifically PayPal.

Technologies used: Nuxt js 3, Tailwind CSS, State Management, Axios, Node.js, Express.js, and MongoDB

CAFE SOLUTION

<http://cafev3.addwebprojects.com>

Summary: I am creating front-end using Nuxt.js 3. Also integrate the RazorPay payment gateway, and work on the Django API integration.

Technologies Used: Nuxt.js 3, Tailwind CSS, State Management (Pinia js), Axios

INSTAGRAM BOT

Summary: I have created an Instagram bot that can find posts based on specific keywords and automatically post custom comments. The bot also has the ability to automatically login in multiple Instagram account.

Technologies Used: Node js and Puppeteer js

ALPHA DESIGN SPOT DASHBORD

<https://alphadesignspot.com/>

Summary: I have developed an interactive and user-friendly admin dashboard using Nuxt.js 3. The dashboard allows the admin to easily manage the design and users of the application.

Technologies Used: Nuxt.js 3, Tailwind CSS, State Management (Pinia js), Axios

SUMMARY

over 2+ years of experience as a Web Application developer, I specialize in crafting elegant and user-friendly interfaces using Vue.js. My expertise extends to Node.js, and I am well-versed in server deployment and administration processes. Proficient in Git version control, I contribute effectively to software development teams. My commitment lies in creating scalable, efficient, and high-quality user experiences for web applications. I am always eager to learn and stay updated on the latest web technologies, ensuring that my skills align with industry trends and best practices.
